Learning Management System Launch

*An excellent way to deliver
online training!*

We are happy to announce the launch of our new Learning Management System on January 31st, 2021.

In today's working world, a Learning Management System (LMS) is a significant part of any company's learning and development strategy. We are populating the LMS with eLearning content and training that supports your business as well as employee growth and development.

The LMS portal has training content in the areas of TRIP, NIMS, SHRP2, Managed Lanes, HERO, CHAMP, SSPIA, TMC, TIM, professional development training, and a whole lot more. These will be readily accessible to you by a quick login to the LMS platform after your user profile has been created.

You can seamlessly access the LMS through the Time Task Force website by clicking on the "E-Learning" tab in the learning center section.

Are you out in the field? We have you covered with our intuitive "GO. Learn" mobile app. Simply download the GO. Learn App via your IOS or Android device and you will be off to a great and continuous learning experience.

Benefits of the LMS

★ 1. Saves time and money

The use of LMS to create, manage, and carry out educational and training programs saves businesses hours of travel time for training sessions, stays in hotels, etc. Online classrooms allow simultaneous training of people studying from different geographical locations, and these courses **can be used again and again with new groups of learners.**

★ 2. Efficient management

Allows for efficient management of registrations/sign ups, and creation of groups and courses. It is a powerful tool that **allows creation and management of content and subjects in a simple and intuitive way.** Participants can upload and share and work on projects with their teachers and fellow learners, which in turn is stored in a database.

★ 3. Easy access to information

All of the information is structured in an organized way in the same place, making it accessible to all users. Courses, calendars, multimedia content, archives, and evaluations are accessible in just one click. All learners have **access to learning content and materials at any time and from any place where they have internet access.**

★ 4. Evaluations

Individual user profiles and user IDs can be created without the need for additional installations and can function simultaneously with web access. The possibilities are endless and also **includes feedback evaluations and surveys.**

★ 5. Up-to-date / immediate content

LMS allows administrators instant access to **update the content of courses, add materials, and resources for participants for immediate access.**

★ 6. Advanced reporting

Allows creation, personalization, and download of **detailed reports outlining the progress of learners, groups, completion of work, time taken etc.,** which allows easy evaluation of progress either as a group or individually.

★ 7. Multimedia and mobile learning

Learning content is comprehensive, user friendly, and practical – using video, images, audio, and text that all serve as great tools in learning new skills or information. Users can **access learning content using any mobile device** including Android or IOS cell phones.
